

# Distribution fibre in duct

## As-built requirements

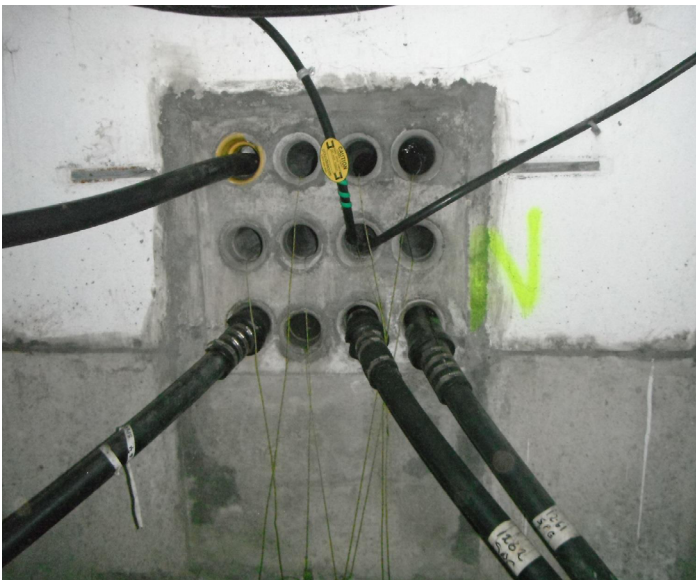

### GENERAL REQUIREMENTS

Provide low-resolution, clear digital pictures (JPEG Format) within each manhole naming the photo with the following naming convention: **MH#-DirectionFacing** (i.e. MH1237-Northwall.jpg).

### FIBRE IN DUCT INSTALLATIONS

#### As-built submissions need to include:

- As-constructed version of the drawing
- Photos inside each manhole showing installation of subducts and fibre at both entry and exit walls
- Photos showing colour-coding identification of fibre cables and tagging of subducts at each point of entry/exit
- Photos of all splice cases and supports
- Photo of cable racking

#### BC Hydro requires 3rd Party Licensee As-Built information for the following reasons:

1. Confirmation that installations meet CSA and BC Hydro safety and standards requirements
2. Ensure what is recorded in our GIS matches what is installed in the field
3. Ensure that our billing accurately captures in-field installations
