

Pole Top Wireless Program Offer

We are helping you to connect people all over the province

If you're looking to expand your coverage needs, make use of the pole top space on our distribution poles to build and support your network.

Is this offer for you?

If you're looking to attach wireless equipment to build or grow your network, our distribution pole top space can provide a solution for your needs.

The offer

Leverage BC Hydro's distribution pole top space for your wireless attachments. By installing a taller pole, customers will be able to mount several antennas up to 15 meters above ground, connected to your nearby control equipment. The entire installation will be powered by BC Hydro—supplied service. If you encounter an issue with your equipment, we will connect you with our maintenance team who can access your pole top equipment and work with you to provide a resolution.

SOME GUIDELINES APPLY:

- Customers will enter into a Master Services Agreement with BC Hydro to participate in the Pole Top Wireless program.
- Customers will develop site designs in accordance with relevant BC Hydro guidelines and standards.
- Customers are responsible for necessary public consultation and stakeholder engagement prior to installation approval.
- Customers are responsible for obtaining all necessary municipal and federal permits associated with their wireless installation.

Why Choose BC Hydro?

Location is everything

Wherever people go in our province, we are likely already there. Make use of pole top space all the way from remote communities with limited network access to highly populated urban regions in need of network densification.

Building your Network with us

Leverage BC Hydro assets to build your network

UNDERSTANDING YOUR NEEDS

We will work with you to select and reserve the pole best suited to meet your needs, and assign a dedicated team to manage your project from start to finish.

PREPARING FOR YOUR INSTALLATION

We will partner with you to make our assets ready for your installations.

CONSTRUCTING YOUR SITE

Once you have all applicable permits in place, our construction team will work with you to safely and efficiently build your pole top wireless solution.

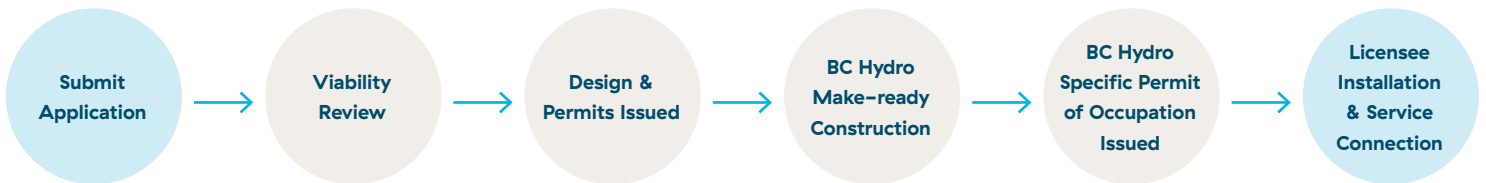

CONNECTING TO OUR GRID

When you are ready to “turn up” your site, apply for an electric service connection and we can provide reliable, affordable, clean electricity to power your equipment.

Working Together

You can rely on our expert field resources to help build and maintain your critical network infrastructure. In the event of service interruptions or equipment failures, our crews will work with your field resources to fix problems as quickly as possible.

What does the process look like?

Expected costs

Design and construction fees will vary by site. Please contact us for an estimate.
